

Dear Westfield Resident,

On behalf of the Town of Westfield and the Westfield Green Team, welcome to Westfield! We know you have a lot on your plate, but we wanted to empower you to take advantage of some exciting green tax credits. The *Inflation Reduction Act* is a historic law that can help you save money and reduce your carbon footprint. It offers a range of tax incentives and rebates that provide direct benefits to homeowners like you.

Some of the tax credits you have the opportunity to take advantage of include:

Energy efficient home heating enabled by heat pumps.

A brand new electric vehicle.

Energy bill slashing rooftop solar.

You can learn more about the tax credits available today from official sources using the QR Codes provided on back of this letter, including the IRS Credits and Deductions Guide [1] and New Jersey's own programs [2]. We're also listing third-party tools [3] to show you additional tax credits that are available for solar battery storage, upgraded electric panels and wiring, electric stoves, and the solar potential of your roof [4].

There is some local context important for leveraging these tax credits. If your roof is a good candidate for solar panels, Westfield residents can add solar panels compliant with Westfield's solar panel ordinance [5]. Also, the Westfield Home Energy Savings Program offers residents an energy audit at a discounted rate of \$49 to help identify opportunities to improve efficiency and comfort [6].

These tax credits, eligibility requirements, and green opportunities will keep changing; luckily, the Green Team has a newsletter [7] that helps keep Westfield residents up to date about these changes and how they impact you.

Happy savings!
